SUBJECT: Lower San Pitch River Assessment for 1975 & 1976- *see minutes*

Attached you will find an assessment for the water users for the Lower San Pitch River system. Based on your direction and the recommendations of Chairman Kjar, the assessment formula was as follows: For all water users, except Stanley Price, one-half of the total assessment was based on acreage serviced; and the other half of the assessment was based upon the amount of water delivered. For Mr. Price, one-half of his assessment was figured on an acreage basis and his flow assessment was based upon his decreed 10 second-foot right for the months of April and May, and for those waters measured by the river commissioner for June through November 15. For those water users whose assessment was less than \$5, a minimum of \$5 was assessed.

On Wednesday, January 29, I contacted Chairman Kjar and informed him of this method of assessment. He was in agreement and indicated that it would be alright to send out the assessment to the water users.
